

www.LA3.com.au

**SPECIES**

*Lepironia articulata*

**COMMON NAME**

Blue Rush

**ORIGIN**

In wetlands from about Wollongong north into Queensland and the Northern Territory

**DESIGN USE**

Used extensively for planting in wetlands constructed for urban run-off management and for decorative ponds and lakes. It can be grown in a large pot or container in a home garden pond where it may end up being used as a launching pad for emerging dragonflies.

**HEIGHT**

40–200 cm upto 2.5m

**SPREAD**

2–10 mm diam

**HABIT**

Native grey green perennial. Hollow, cylindrical stems with basal sheathing scales

**FORM**

Stiffly erect, grey green clumps.

**FLOWERS**

Brown nut like flowers

**FLOWERING PERIOD**

Spring to autumn

**CLIMATIC TOLERANCES**

**HORTICULTURE**

Requires consistent, clear, deep water. Suitable for acid waters with low nutrient levels.
