SPECIES Lomandra 'Breeze'
COMMON NAME Dwarf Mat Rush
ORIGIN
DESIGN USE

HEIGHT

2-4 feet

SPREAD

2-4 feet

HABIT

Grass like

FORM

An evergreen perennial with narrow deep green strap-shaped leaves that are curiously cut as though with pinking shears at the tips. Its light green, thick, strap-like leaves are accented by spiny flower spikes with tiny creamy yellow male flowers, lightly scented like sweet honey in the afternoon

FLOWERS

Yellow, Fragrant Flowers: Yes

FLOWERING PERIOD

Summer

VARIATIONS

Lomandra longifolia 'Tanika'

CLIMATIC TOLERANCES

Drought tolerant; Winter Hardiness: 15-20° F; Hardy to below 20° F - plants were undamaged in a landscape north of Atlanta, Ga. after a temperature was recorded of 16° F.

HORTICULTURE

Full Sun, low water needs; It is tolerant of a wide range of conditions and requires little to no maintenance once established. Plant in full sun to moderate shade. It is drought tolerant once established but can also tolerate regular irrigation or even wet soils.
