SPECIES

Lomandra longifolia 'Cassica'

COMMON NAME

Cassica, Coastal Mat Rush

ORIGIN

DESIGN USE

Mass planting, patio pot plants and for low water gardens. Ideal for mass planting in garden beds, borders, fence lines and low water gardens where a tough ornamental plant is necessary.

HEIGHT

1m

SPREAD

1m

HABIT

An upright perennial, very dense in its growth and leaf configuration.

FORM

A blue foliage form of Lomandra with broad rigid leaves.

CLIMATIC TOLERANCES

It tolerates sandy and coastal positions. Also it is drought and frost tolerant.

HORTICULTURE

Grows well in full sun to shaded positions. It prefers well drained sandy or sandstone type soils. Plants need little or low maintenance as water is only required to keep the plant healthy for the 1st few weeks.
