<b>SPECIES</b>	Allamanda cathartica 'Sunee'
<b>COMMON NAME</b>	Allamanda sunee
<b>ORIGIN</b>	Mexico to Argentina
<b>DESIGN USE</b>	Pruned as a shrub or trained as a compact climber

#### HEIGHT

.08–1.5m (unsupported)

#### SPREAD

1.2–2m

#### HABIT

Compact Rambler (shrubby climber) evergreen in the tropics, semi-dormant in cooler sub-tropics.

#### FLOWERS

Yellow, bell-shaped to 6cm diameter

#### FLOWERING PERIOD

Through most of the year in the tropics

#### LEAVES

Whorled, to 6cm, glossy dark green

#### VARIATIONS

"Silver Sunee" (solid metallic glaucous foliage)

#### CLIMATIC TOLERANCES

Will tolerate almost any climate even long periods of dryness.

#### HORTICULTURE

The cultivars prefer moist well drained soil with best flowering in full sun. However light shade appears to be beneficial in hot arid climates, and generous mulching essential.
