

| | |
|--------------------|--|
| SPECIES | Carex gaudichaudiana |
| COMMON NAME | Clumping creek sedge |
| ORIGIN | China and Japan |
| DESIGN USE | Foliage plant, houseplant, porch and patio plant, for shaded areas |

HEIGHT

0.6m

SPREAD

1m

HABIT

It forms neat grassy clumps.

FORM

A highly variable species with a densely tufted, creeping rhizome.

FLOWERS

During summer it produces glossy black flower heads, each flower being bordered with green, giving the whole flowerhead the appearance of a lizard's tail.

FLOWERING PERIOD

Spring

CLIMATIC TOLERANCES

Very hardy in full sun to semi-shaded positions with water.

HORTICULTURE

Requires moist, open situation. Forms thick swards. Often found on creek banks in waterlogged areas, or permanent shallow water.
