**SPECIES**

Jasminum nitidum

**COMMON NAME**

Star Jasmine, Angelwing Jasmine, Confederate Sasmine,

**ORIGIN**

New Guinea's Admiralty Islands

**DESIGN USE**

Hedges, foundation plant, shrubby ground cover, or to cover a fence or trellis

**HEIGHT**

Can grow 6.1m long but in the garden is often trimmed as a bushy shrub that gets little more than 0.6-1.2m.

**SPREAD**

2m

**HABIT**

An evergreen or semi-evergreen vine or shrub that is fast-growing and becomes woody with age.

**FORM**

Semi-twining plant easily held to a shrub form.

**FLOWERS**

Sweetly fragrant, snow-white, pinwheel shaped flowers to almost 2 in across. The flowers start out as purplish buds and retain some pinkish-purple on the calyx. They bloom at night.

**FLOWERING PERIOD**

Late spring and throughout the summer

**CLIMATIC TOLERANCES**

USDA Zones 10 - 11. Angelwing jasmine is frost-tender. It can be grown with winter protection in zone 9.

**HORTICULTURE**

Full sun to almost full sun, doesn't do well in shade. It needs regular watering, especially during the growing season. It has moderate salt tolerance and is adaptable to most any soil.
